**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohtomo (20020008866).

Referring to claim 11, Ohtomo shows a handheld laser distance measuring device comprising a laser (see figure 1 Ref 11 and 30) being integrated in a housing, a position sensor for determining the spacial orientation of the distance measuring device, wherein the position sensor is connected with a signal transducer (see figure 3 Ref 11, 22, 21, and 16), whereby the position sensor and the signal transducer are integrated in said housing (see figures 2 and 3), whereby the signal transducer is capable of being triggered by the position sensor to emit a perceptible signal which depends on the spacial orientation and wherein the signal transducer is optical signal transducer, an acoustic signal transducer or a tactile signal transducer (see figure 2 and 3 Ref 16).

Referring to claim 12, Ohtomo shows the optical signal transducer is aimed to emit a signal being perceptible by sighting a target object (see figure 2).
